	E-mail: minwoo.lee@wku.edu	Phone +1 270 320 4897	
Office Hours/ Office Location	To be announced		

I . Course Overview

1. Course Description

This is an introductory course that presents the basic principles used in financial management and their applications in the long-term investment and financing. These principles are characterized in time value of money and relation between risk and return. Once the students acquire the basic knowledge on these principles, they will learn how to apply their knowledge to the valuation of stocks and bonds, financial planning, capital budgeting, long-term financing, capital structure, and dividend policy and risk management.

Upon completing this course the students ought to be able to make basic decisions regarding which project to take, and if so, when; how to finance a project; how much of payouts, in what form, to make; how much debt to carry; and how to hedge away potential risks associated with basic operations of a firm. This course also lays foundation for more advanced investment and corporate finance topics to be taught in the higher-level finance courses.

2. Prerequisites

None

3. Course Format

Lecture	Discussion/Presentation	Experiment/Practicum	Field Study	Other
100 %	%	%		%

(Instructor can change to match the actual format of the class.)

Explanation of course format:

We will have lectures in which we study concepts, go over problems and address real-world issues related to the course materials.

4. Course Objectives

- Develop critical thinking skills of financial concepts
- Familiarize with the types of the decisions that typically confront financial managers
- Understand the risk–return relationship and time value of money in corporate investing and financing decisions and in financial investments
- Ensure that students are competent in the utilizing knowledge of analytical techniques commonly employed in the financial decision-making process

5. Evaluation System
