I. Course Overview

1. Course Description

In this course, Students will produce original artworks for a visual journal and learn skills and techniques associated with a variety of art media.

The course will take students through the illustration process, from concept sketches to finished artwork. Students in this class are encouraged to develop their own unique voice as designers/illustrators by learning in conjunction with other courses, weekly excursions to Seoul, gallery tours, and all other lines of inquiry both inside and outside the school. As a result of successfully completing this course, students will be able to develop a personal style and point of view in their visual journal with the help of technique demonstrations that are designed to inspire experimentation.

- This course is closely related to the Design Creation course in terms of field trips and projects. Therefore, it is recommended not to enroll in both classes if possible.
- The use of AI image generators is prohibited in this course.
- Art material costs for the projects may be charged separately.
- The Field Trip locations are subject to change.
